

Perspective Rendering Street View

Perspective Rendering Interior View

Project Description:

11-unit townhouse complex located in the historic Pine Street district of Montclair. Approvals included presentation to the Montclair Historic Commission as well as the Planning Board. Careful attention was paid during the design process to blend the new architecture with the surrounding area by using building forms and materials sensitive to the adjacent historic structures. The project is located one block from the train station promoting “transit oriented” development.
